Activity – Dislocation - Landscape

All moving image work has an important sound component: please use headphones or speakers.

A selection from work exhibited

Volume and Frequency

Surfers wait patiently for waves,
trees are moved by the wind,
punctuated by intervals of colour.

6 minutes 30 seconds
video with sound 2009

No Love No Hate

A musical instrument produces a tonal sound when rotated through the air by a length of cord. This sound resonates across the landscape, its tone shifting according to the various vantage points from which it is heard and filmed.
